BRIEF MENTAL HEALTH UPDATE

There are several possible approaches for obtaining a mental health update. The following have been chosen by our experts for consideration.

Rosen: Brief Mental Health Update

Following are suggested questions for obtaining a brief mental health update. The first 5 are suggested for regular use. Additional questions can be offered depending on the child and situation.

1. “Tell me, in general, how you think things have been going for you lately?”
2. “Many of my other patients have been talking to me about ‘stress’; what are the things that are most stressful for you these days? How do you manage stress?”
3. “How would you describe your mood over the past few weeks? Does this seem any different from usual for you?”
4. “Does it seem that you’ve been feeling more irritable or angry lately?”
5. “What changes have you noticed lately in your sleeping?”
6. “How has your energy level been lately? Have you been feeling more tired or more restless than usual?”
7. “What types of fun things have you done lately?”
8. “Have there been any changes in how you are getting along with people, like your parents, your family, or your friends?”
9. “I notice that your weight has changed since the last time I saw you. What do you think about that?”

Dubowitz: Clinical Parent Screening Questionnaire

1. Lately, do you feel down, depressed, or hopeless?
2. During the past month, have you felt very little interest or pleasure in the things you used to enjoy?

CRAFFT: Substance Abuse Screening

The CRAFFT lead-in questions can be used during a brief encounter with an adolescent:

During the past 12 months, did you...
1. Drink any alcohol (more than a few sips)?
2. Smoke any marijuana or hashish?
3. Use anything else* to get high?

*“Anything else” includes illegal drugs, over-the-counter and prescription drugs, and things that you sniff or “huff.”

If answers to any of these questions are yes, go to the full CRAFFT, below. (Positive CRAFFT screen is “yes” response to 2 or more questions). If no, ask the CAR question:

C: Have you ever ridden in a CAR driven by someone (including yourself) who was high or had been using alcohol or drugs?
R: Do you ever use alcohol or drugs to RELAX, feel better about yourself, or fit in?
A: Do you ever use alcohol or other drugs while you are by yourself or ALONE?
F: Do you ever FORGET things you did while using alcohol or drugs?
F: Do your FAMILY or FRIENDS ever tell you that you should cut down on your drinking or drug use?
T: Have you ever gotten into TROUBLE while you were using alcohol or drugs?

### Brief Mental Health Update

**Task Force on Mental Health Algorithm Teams: Brief Mental Health Update by Age**

| Using an Acute Care Visit for a Brief Mental Health Update:  
| Suggested Questions by Age* |
|---|---|---|
| Ages 0 to 5 y | Ages 5 to 12 y | Ages 12 to 21 y (parent/child separately) |
| ▪ How have things been going since our last visit? | ▪ How have things been going since our last visit? | ▪ How have things been going since our last visit? |
| ▪ How are you coping with [the presenting acute illness]? | ▪ How are you coping with [the presenting acute illness]? | ▪ How are you/is your child coping with [the presenting acute illness]? |
| ▪ How is [the illness] affecting your child, other than primary symptoms? | ▪ How is [the illness] affecting your child, other than primary symptoms? | ▪ How is [the illness] affecting you/your child, other than primary symptoms? |
| ▪ (If an injury) How did it happen? | ▪ (If an injury) How did it happen? | ▪ (If an injury) How did it happen? |
| ▪ How is your child sleeping, in general and in light of the condition? | ▪ How is your child sleeping, in general and in light of the condition? | Had anyone been drinking or using drugs? |
| ▪ How are things going at home in general? | ▪ How are you/is your child sleeping, in general and in light of the condition? | ▪ How are you/is your child getting along at home? At school? |
| ▪ Is there anything else that’s worrying you about parenting your child? | ▪ What is the best part of parenting this child? What is the most difficult part? | ▪ [Parents of] teenagers often mention that they are having difficulties with stress, worries, or changes in mood—has this been a problem for you/your child? |

*Select questions as appropriate to the clinical circumstances and time available.
