
An error occurred in the article by Claure et al (doi: 10.1542/peds.2010-0939). The second sentence of the Figure 1 legend reads:

The hourly median FiO₂ values during the 24 hours of the automated period (open triangles) remained consistently lower than the hourly median FiO₂ values during the 24-hour manual period (closed triangles).

The Figure 1 legend should read:

The hourly median FiO₂ values during the 24 hours of the automated period (closed triangles) remained consistently lower than the hourly median FiO₂ values during the 24-hour manual period (open triangles).

doi:10.1542/peds.2011-0133

An error occurred in this article by Zhang et al (doi: 10.1542/peds.2010-1223). The Financial Disclosure currently reads, “The authors have indicated they have no financial relationships relevant to this article to disclose.” This should have read, “This study was supported by a Brazilian National Council for Scientific and Technological Development (CNPq) research grant (67/2009-REBRATS).”

doi:10.1542/peds.2011-0216

A data management error occurred in this article by Hovi et al (doi: 10.1542/peds.2010-2199) that resulted in a change in the number of current smokers. The authors have rerun all corresponding analyses and ascertained that the mistake left the other results unaffected.

On page number e307, under “Endothelial Vasodilatory Function,” it reads, “After adjusting for BMI or with only the 136 nonsmokers included, the difference in FMD remained similar.” This should have read: “After adjusting for BMI or with only the 127 nonsmokers included, the difference in FMD remained similar.”

In Supplemental Table 2, “Characteristics of Participants With or Without Ultrasound Measurements,” under “Current smoker,” (regarding the VLBW subjects) the row reads from left to right, “16 (22.5); 14 (15.2); .23; 1.00”. This should have read: “20 (28.2); 15 (16.3); .07; .12.”

In the same table, under “Current smoker,” (regarding the term born subjects) the row reads, “17 (16.8); 10 (14.7); .71”. This should have read: “39 (38.6); 18 (26.5); .10.”
