
ERRATA

American Academy of Pediatrics. School-Based Health Centers and Pediatric Practice. *Pediatrics*. 2012;129(2):387–393

An error occurred in the American Academy of Pediatrics policy statement “School-Based Health Centers and Pediatric Practice” published in the February 2012 issue of *Pediatrics* (2012;129[2]:387–393; originally published online January 30, 2012; doi: 10.1542/peds.2011-3443). On page 390, in Challenge No. 5, the organization listed as National Association for School-Based Health Centers should have been National Assembly on School-Based Health Care. We regret the error.

American Academy of Pediatrics. Recommended Childhood and Adolescent Immunization Schedules—United States, 2012. *Pediatrics*. 2012;129(2):385–386

A minor clarification has been made in the American Academy of Pediatrics policy statement “Recommended Childhood and Adolescent Immunization Schedules—United States, 2012” published in the February 2012 issue of *Pediatrics* (2012;129[2]:385–386; doi:10.1542/peds.2011-3630). In Fig 1: Recommended immunization schedule for persons aged 0 through 6 years—United States, 2012, the second bullet in footnote 1 regarding hepatitis B immunization should read, “For infants born to hepatitis B surface antigen (HBsAg)–positive mothers, administer HepB vaccine and 0.5 mL of hepatitis B immune globulin (HBIG) within 12 hours of birth. These infants should be tested for HBsAg and antibody to HBsAg (anti-HBs) 1 to 2 months after completion of at least 3 doses of the HepB series, at age 9 through 18 months (generally at the next well-child visit).”

The corrected schedule is now posted online at <http://pediatrics.aappublications.org/> and *Red Book Online*. Please note that it will differ from the version that appeared in the print journal.
