ERRATA

An error occurred in the AAP policy statement “Immunization for *Streptococcus pneumoniae* Infections in High-Risk Children” published in the December 2014 issue of *Pediatrics* (2014;134(6):1230–1233). In Table 1 (p 1231), the rows were incorrectly formatted. In the Condition column, the row for “Congenital or asplenia or splenic dysfunction” should have an X under “Recommended” for PCV13 and should have an X under “1 Dose” and “Repeated Dose” for PPSV23. The electronic version of the statement that is posted online has been corrected.

doi:10.1542/peds.2015-0451

On page 516, under Results paragraph 1, on lines 1–10, this reads: “Overall, 707 (83.7%) of the 845 pooled cases (ie, all sites combined) were classified as definite; case status for 82.0% of definite cases was based on DNA analysis demonstrating a dystrophin mutation (Table 1). Among the 765 definite and probable cases, most were non-Hispanic white (57.6%), diagnosed with DMD (79.6%), and the only case in the family (78.6%).” This should have read: “Overall, 707 (83.7%) of the 845 pooled cases (ie, all sites combined) were classified as definite (Table 1); case status for 82.0% of definite cases was based on DNA analysis demonstrating a dystrophin mutation (data not shown). Among the 765 definite and probable cases, most were non-Hispanic white (57.6%), diagnosed with DMD (71.0%), and the only case in the family (78.6%).”

On page 518, under Discussion paragraph 3, on lines 8–12, this reads: “It also was less comparable to other studies of original data, which reported prevalence of DBMD among all male individuals in the population.” This should have read: “It also was less comparable to other studies of original data on prevalence of DBMD among all male individuals in the population.”

doi:10.1542/peds.2015-0852

An error occurred in the article by Betancourt et al, titled “HIV and Child Mental Health: A Case-Control Study in Rwanda” published in the August 2014 issue of *Pediatrics* (2014;134(2): e464–e472; doi:10.1542/peds.2013-2734). On page e464, in the abstract under the heading Results, lines 24–25 read: “These results remained significant after controlling for contextual variables.” This should have read: “After controlling for contextual variables, there were no significant differences on mental
health outcomes across groups, reflecting a potential explanatory role of factors such as daily hardships, caregiver depression, and HIV-related stigma.”

doi:10.1542/peds.2015-0753

doi:10.1542/peds.2015-0804

On page e129, Fig 1, A and B, the third percentile line is missing for both the male and female subjects. This line is lower but closely parallels the other percentile lines.

In the Figure Legend for Fig 1, this reads: “(male subjects [upper] and female subjects [lower])”. This should have read: “(male subjects [left] and female subjects [right]).”
