

An error occurred in the article by Olson et al, titled “Outbreak of *Mycoplasma pneumoniae*-Associated Stevens Johnson Syndrome,” published in the August 2015 issue of *Pediatrics* (2015;136[2]:e386–394; doi:10.1542/peds.2015-0278).

On page e386, under Abstract, lines 12 and 13 read: “(odds ratio [OR] 10, confidence interval [CI] 1.3–5.1), preceding respiratory symptoms (OR 30.0, CI 1.6–72.6).” This should have read: “(odds ratio [OR] 7.5, confidence interval [CI] 1.6–35.1), preceding respiratory symptoms (OR 30.0, CI 3.3–269.4).”

On page e389, under Results, lines 18 through 21 read: “pneumonia (odds ratio [OR] 10, confidence interval [CI] 1.3–5.1) and to have preceding respiratory symptoms (OR 30.0, CI 1.6–72.6).” This should have read: “pneumonia (odds ratio [OR] 7.5, confidence interval [CI] 1.6–35.1) and to have preceding respiratory symptoms (OR 30.0, CI 3.3–269.4).”

On page e390, Table 3, the OR (CI) for Pneumonia appeared as follows: “10.0 (1.3–5.1),  $P = .002$ .” It should have read “7.5 (1.6–35.1),  $P = .013$ .” The confidence intervals for the following variables in Table 3 should have read as follows, with no change in the odds ratio or statistical significance (except as noted): male, 0.4–5.9; race, nonwhite, 0.0–1.4; ethnicity, Hispanic, 0.2–3.7; fever, 0.2–25.3; conjunctival involvement, 0.2–25.3; genital involvement, 0.3–7.8; skin involvement, 0.1–1.9; recurrent SJS, 0.4–10.7; preceding URI symptoms, 3.3–269.4; household contacts with URI, OR of 2.3 instead of 2.0 and CI 0.4–12.4; ICU admission, 0.4–6.3; and amniotic graft, 0.3–4.7. A corrected version of the table is supplied here.
