MOTHER'S BEHAVIOR

Acknowledgment

This work is supported by the Grant Foundation and the Educational Foundation of America. We thank Drs. R. Fantz and J. Fagan, Susan Reeves, and Dr. S. Miranda for advice and criticism. We also wish to express our gratitude to the nurses in the premature nursery, without whose skill and cooperation this study could not have been undertaken.

CORRECTION

In the article by Bruce D. Ackerman, et al. in the June issue of Pediatrics, 45:918, 1970, the sentence beginning on line 2 of the left hand column of page 923 should be two sentences, which should read as follows: Case 6 did not show the spastic signs described by Van Praagh, but did show slowing of the respiratory rate and decreased depth of respiration. Case 4 showed these respiratory changes, in addition to spasticity.
HYPERBILIRUBINEMIA AND KERNICTERUS IN SMALL PREMATURE INFANTS
Burce D. Ackerman, Geraldine Y. Dyer and Mary M. Leydorf

Pediatrics 1970;46:192
