The Transfer of Drugs and Other Chemicals into Human Breast Milk

In this statement, lists of the pharmacologic agents transferred into human breast milk and their possible effects on the infant or on lactation if known are provided (Tables 1 to 4). The fact that infant but indicates that there are no reports in the literature. These tables should assist the physician in counseling a patient regarding breast-feeding when the patient has a condition for which a drug

**TABLE 1.** Drugs That Are Contraindicated During Breast-Feeding

<table>
<thead>
<tr>

<td>Risk of thyroid cancer; radioactivity in milk present for 12 d</td>
<td>15</td>
</tr>
<tr>
<td>Iodine-131 (¹³¹I)</td>
<td>Radioactivity in milk present 2-14 d depending on study.</td>
<td>16-19</td>
</tr>
<tr>
<td>Radioactive sodium</td>
<td>Radioactivity in milk present 96 h</td>
<td>20</td>
</tr>
<tr>
<td>Technetium-⁹⁹m (⁹⁹mTc), ⁹⁹mTc macroaggregates, ⁹⁹mTc O₄</td>
<td>Radioactivity in milk present 15 h to 3 d</td>
<td>21-25</td>
</tr>
</tbody>
</table>

a pharmacologic agent does not appear on the lists is not meant to imply that it is not transferred into breast milk or that it does not have an effect on the is medically indicated.

These reports have been obtained from a search of the medical literature. Because methodologies used to quantitate drugs in breast milk continue to improve, current information will require continuous updating of the tables. Brand names are listed

† Drug is concentrated in breast milk.

at the end of the tables in accordance with the 4th Edition AMA Drug Evaluation. The reference list is not inclusive of all articles published.

Physicians who encounter adverse effects in infants fed breast milk due to exposure to drugs that are not included here are urged to document the effects in a communication to the Committee on Drugs of the American Academy of Pediatrics in Evanston. Such communication should include: the generic and brand name of the drug; the maternal dose and mode of administration; the concentration of the drug in breast milk and maternal and infant blood in relation to time of ingestion; the age of the infant; and the method used for laboratory identification. Such reports may significantly increase the pediatric community’s fund of knowledge regarding drug transfer into breast milk and the potential risk to the infant.

Drugs cited in Tables 1 to 4 are listed here by category, in alphabetical order by generic name. For convenience, one or more examples are also given.

ANESTHETICS, SEDATIVES
methyprylon-Noludar
secobarbital-Seconal, Seco-8

ANTICOAGULANTS
bishydroxycoumarin-Dicumarol
phenindione-Hedulin, Eridione
warfarin-Coumadin, Panwarfin

ANTIEPILEPTICS
carbamazepine-Tegretol
ethosuximide-Zarontin
phenytoin-Dilantin
primidone-Mysoline
thiopental-Pentothal
valproic acid-Depakene

ANTIHISTAMINES, DECONGESTANTS, AND BRONCHODILATORS
clemastine-Tavegil, Tavist
dexbrompheniramine maleate with d-isoephedrine-Drixoral, Disophrol Chronotab
diphenhydramine-Benadryl, Benylin cough syrup
dyphylline-Dilor
theophylline-Theo-Dur, Elixophyllin, Slo-Phyllin, Bronkodyl
triimeprazine tartrate-Temaril
tripelemamine-Pyribenzamine

ANTIHYPERTENSIVE AND CARDIOVASCULAR AGENTS
atenolol-Tenormin
captopril-Capoten
digoxin-Lanoxin, SK-Digoxin
disopyramide-Norpace
guanethidine sulfate-Ismelin
hydralazine-Apresoline
methyl dopa-Aldomet
metoprolol-Lopressor
nadolol-Corgard
propranolol-Inderal
reserpine-Serpasil, Reserpoid, Hiserpia

### ANTIIINFECTIVE AGENTS
- amantadine-Symmetrel
- cefadroxil-Duricef
- cefazolin-Ancef, Kezol
- cefotaxime-Clarithan
- chloramphenicol-Chloromycetin
- clindamycin-Cleocin
- ethambutol-Myambutol
- isoniazid-INH
- metronidazole-Flagyl
- nalidixic acid-NegGram
- nitrofurantoin-Furadantin, Nitrofur, Macrobidin
- pyrimethamine-Daraprim
- quinine-Quine
- rifampin-Ripamycin, Rifadin, Rimactane
- salicylasufapryridine-Azulfidine
- sulfisoxazole-Gantrisin
- tetracycline-Achromycin, SK-Tetracycline
- trimethoprim with sulfamethoxazole-Bactrim, Septra, Septra DS

### ANTITHYROID AGENTS
- carbimazole-Neo-mercazole
- methimazole-Tapazole
- propylthiouracil-Propacil
- thiouracil-Thiouracil

### CANCER CHEMOTHERAPY AGENTS
- amethopterin-Methotrexate
- cyclophosphamide-Cytosar

### CATHARTICS
- danthron-Dorbane, Modane

### DIAGNOSTIC AGENTS
- iopanoic acid-Telepaque
- metrizamide-Amipaque

### DIURETICS
- bendroflumethiazide-Naturalin
- chlorothiazide-Diuril, Chlotride
- chlorthalidone-Hygroton, Combipres
- methylothiazide-Aquabuten, Endurone
- spironolactone-Aldactone

### HORMONES
- clorotrianisene-TACE
- estradiol-Estrace
- 3H-norethynodrel-Enovid
- prednisone-Deltasone, Meticorten, SK-Prednisone

### MUSCLE RELAXANTS
- baclofen-Lioresal
- carisoprodol-Relax, Soma
- methocarbamal-Robaxin

### NARCOTICS, NON-NARCOTIC ANALGESICS, ANTIINFLAMMATORY AGENTS
- acetaminophen-Tylenol, TYLENOL Extra Strength, Tempra, Phenaphen
- butorphanol-Stadol
- flufenamic acid-Arle
- gold sodium thiomalate-Mycrinsine
- ibuprofen-Motrin
- indomethacin-Indocin
- mefenamic acid-Ponstel
- meperidine-Demerol, Pethadol
- methadone-Westadone
- naproxen-Naprosyn
- phenylbutazone-Azolid, Butazolidin
- prednisolone-Delta-Cortef, Sterane
- propoxyphene-Darvon, SK65, Dolene

### STIMULANTS
- amphetamine (dexamphetamine sulfate)-Dexedrine
- bromocriptine-Parlodel
- ergotamine tartrate with caffeine-Cafengot

### MISCELLANEOUS
- acetamide-Colchicine
- butanuclechol chloride-Urecholine
- cimetidine-Tagamet
- diphenoxylate with atropine-Lomotil
- tolbutamide-Orinase, SK-Tolbutamide

### FOOD ADDITIVES
- monosodium glutamate-MSG
- saccharin-Sucaryl

### COMMITTEE ON DRUGS, 1982-1983
