

ERRATA

An error appeared in the article by Reynolds et al, titled "Brain-Type Natriuretic Peptide in the Diagnosis and Management of Persistent Pulmonary Hypertension of the Newborn" that was published in the November 2004 issue of *Pediatrics* (2004;114:1297–1304). In "Results" on page 1299, the second paragraph of "Initial BNP Levels," the authors wrote: "An initial BNP level >550 pg/mL was predictive of PPHN ($P < .001$) with sensitivity of 83% and specificity of 100%." It should have read as follows: "An initial BNP level >550 pg/mL was predictive of PPHN ($P < .001$) with sensitivity equal to 100% and specificity equal to 90%."

doi:10.1542/peds.2005-0569

An error appeared in the commentary by Frenkel titled "Challenges in the Diagnosis and Management of Neonatal Herpes Simplex Virus Encephalitis" that was published in the March 2005 issue of *Pediatrics* (2005;115:795–797). On page 796, the second full paragraph, the author wrote: "However, at 3 months of age the infant had seizures with markedly abnormal CSF parameters (CSF: 1415 WBCs per μL with 46% neutrophils, 27% lymphocytes, 27% monocytes, 97 RBCs per μL , protein level of 131 mg/dL, and glucose level of 47 mg/dL) and HSV DNA detected." This sentence should have read as follows: "However, at 3 months of age the infant had seizures with markedly abnormal CSF parameters (CSF: 97 WBCs per μL with 46% neutrophils, 27% lymphocytes, 27% monocytes, 1415 RBCs per μL , protein level of 131 mg/dL, and glucose level of 47 mg/dL) and HSV DNA detected." While I regret this error, a CSF WBC count of 97 cells per μL also represents a CSF pleocytosis and does not change my assessment or views regarding the case.

Pediatric Nutrition Handbook, 5th Edition

Errors appeared in the *Pediatric Nutrition Handbook* (American Academy of Pediatrics. *Pediatric Nutrition Handbook*. 5th Edition. Elk Grove Village, IL: American Academy of Pediatrics; October 2003):

Page 45: Last paragraph: Line 4 should be changed from "maximum daily dose of one vial (ie, 5 μL)" to "maximum daily dose of one vial (ie, 5 mL)."

Page 108: The footnote at bottom of page should state: "There is a difference of opinion among AAP experts on this matter. The Committee on Nutrition acknowledges that the Section on Breastfeeding recommends exclusive breastfeeding for about 6 months."

Page 133: Reference 2: Journal citation should be changed from "*Pediatrics*. 2000; 107:1210–1213" to "*Pediatrics*. 2001;107:1210–1213."

Page 253: First paragraph, line 6: Sentence should be changed from "Many powdered special formulas and strained foods contain modified corn or tapioca starches" to "Many powdered special formulas contain modified corn or tapioca starches."

Page 253: First paragraph: Delete the last sentence of the paragraph: "The amount of modified starch in a few commercial infant desserts may amount to as much as 45% of the total content of the solids."

Page 373: Table 22.2, last row (Pediatric multivitamin), column 2 (<10 kg): 2 mL" should be changed to "2 mL/kg."

Page 373: Table 22.2: footnote ¶ (paragraph mark): "See Table 20.2b" should be changed to "See Table 22.2b."

Page 410: In Length or Stature, last paragraph: Delete reference to Appendix L.

Page 833: Eighth bulleted item: "Raw or unpasteurized honey (Infants less than 2 years of age should avoid all sources of honey.)" should be changed to "Raw or unpasteurized honey (Infants younger than 12 months should avoid all sources of honey)."

Page 921: Table C-1, column 9 (Females 14–18 y), row 8 (Protein): ".085" should be changed to "0.85."
