

## ERRATA

### **Committee on Sports Medicine and Fitness, American Academy of Pediatrics. Promotion of Healthy Weight-Control Practices in Young Athletes. PEDIATRICS 2005;116:1557–1564.**

Two errors occurred in the AAP Policy Statement “Promotion of Healthy Weight-Control Practices in Young Athletes” that was published in the December 2005 issue of *Pediatrics* (2005;116:1557–1564; doi:10.1542/peds.2005-2314). Figure 1 was inadvertently omitted. Also, under recommendation 5, within the brackets in the third sentence, Figure 1 should have been cited instead of Table 3. The reader is directed to <http://aappolicy.aappublications.org/cgi/reprint/pediatrics;116/6/1557> for an updated version.

doi:10.1542/peds.2006-0452

### **Lanari M, Lazzarotto T, Venturi V, et al. Neonatal Cytomegalovirus Blood Load and Risk of Sequelae in Symptomatic and Asymptomatic Congenitally Infected Newborns. PEDIATRICS 2006;117:e76–e83.**

An error appeared in the article by Lanari et al, titled “Neonatal Cytomegalovirus Blood Load and Risk of Sequelae in Symptomatic and Asymptomatic Congenitally Infected Newborns” that was published in the January 2006 issue of *Pediatrics Electronic Pages* (2006;117:e76–e83; doi:10.1542/peds.2005-0629). On page e79, Figure 1, in the text box to the right of 58 enrolled, it reads “4 deaths.” It should read “2 lost and 2 deaths.”

doi:10.1542/peds.2006-0420

### **Wennberg RP, Ahlfors CE, Bhutani VK, Johnson LH, Shapiro SM. Toward Understanding Kernicterus: A Challenge to Improve the Management of Jaundiced Newborns. PEDIATRICS 2006;117:474–485.**

An error appeared in the article by Wennberg et al, titled “Toward Understanding Kernicterus: A Challenge to Improve the Management of Jaundiced Newborns” that was published in the February 2006 issue of *Pediatrics* (2006;117:474–485; doi:10.1542/peds.2005-0395). On page 475, column 2, paragraph 2, the paragraph and equations should read as follows:

The relationship between  $B_f$ , albumin-bound bilirubin concentration (AB), and serum albumin concentration (A) at clinically relevant TSB and A can be expressed as:

$$B_f = \frac{AB}{(A - AB) \times K}.$$

Because  $TSB = AB + B_f$ , and  $B_f$  is extremely low relative to TSB,  $AB \approx TSB$ , and the equation can be expressed as:

$$B_f \approx \frac{TSB}{(A - TSB) \times K}.$$
