## ERRATUM

**Zhang et al, Nebulized Hypertonic Saline for Acute Bronchiolitis: A Systematic Review. *Pediatrics*. 2015;136(4):687–701; doi:10.1542/peds.2015-1914.**

An error occurred in the article by Zhang et al, titled “Nebulized Hypertonic Saline for Acute Bronchiolitis: A Systematic Review” published in the October 2015 issue of *Pediatrics* (2015;136[4]:687–701; doi:10.1542/peds.2015-1914).

On page 689, under Data Synthesis and Statistical Analysis, paragraph 3, on lines 14–15, “withdrawal rate >20%” should have read: “withdrawal rate >15% and intention-to-treat analysis not used.”

The authors also note that they erroneously included 1 unpublished inpatient trial (NCT01488448) that included patients with previous wheeze. Removal of this trial from the meta-analysis changes the results of hypertonic saline on length of stay from an MD of –0.45 days (95% confidence interval –0.82 to –0.08) to MD of –0.51 days (95% confidence interval –0.91 to –0.11). Exclusion of this trial from the subgroup analyses does not significantly affect the results.
