ERRATUM

In the article entitled "Neurologic History and Examination Results and Their Relationship to Human Immunodeficiency Virus Type 1 Serostatus in Hemophilic Subjects: Results from the Hemophilia Growth and Development Study" by James F. Bale, Jr, MD et al that appeared in the April 1993 issue of *Pediatrics* (1993;91: 736-741) an error was made in the entry of the baseline data. This data entry error relates to the number of HIV-1 positive subjects who had non-hemophilia-related decreases in muscle bulk. This change and its effect on the statistical analysis are summarized below:

	HIV+	HIV-	
Non-hemophilia bulk decrease present	6	0	
Non-hemophilia bulk decrease absent	<u>201</u>	<u>126</u>	
	207	126	P = .0868
