Sample sizes ranged from 15 664 in 2013 to 24 690 in 2004 for this analysis.

<sup>a</sup> Consistently measured products are those “other” tobacco products (excluding cigarettes and e-cigarettes) that were measured across all waves of NYTS data collection (2004–2014): chewing tobacco, snuff, or dip; cigars, cigarillos, or little cigars; pipe tobacco; and bidis.

<sup>b</sup> Includes kreteks (clove cigarettes), roll-your-own cigarettes, flavored cigarettes, flavored cigars, snus, and hookah/waterpipe when measured.

<sup>c</sup> Sample prevalence of lifetime exclusive use of other tobacco products (not in combination with cigarettes and/or e-cigarettes).

<sup>d</sup> Sample prevalence of past-30-day use of other tobacco products (not in combination with cigarettes and/or e-cigarettes).
