

## Supplemental Information

### ACKNOWLEDGMENTS

The NIH, the NICHD, the National Center for Research Resources, and the National Center for Advancing Translational Sciences provided grant support for the NRN's generic database and follow-up studies through cooperative agreements. Although NICHD staff did have input in the study design, conduct, and analysis and article drafting, the content is solely the responsibility of the authors and does not necessarily represent the official views of the NIH.

Data collected at participating sites of the NICHD NRN were transmitted to RTI International, the data coordinating center (DCC) for the network, which stored, managed, and analyzed the data for this study. On behalf of the NRN, Dr Abhik Das (DCC principal investigator) and Dr Carla Bann (DCC statistician) had full access to all the data in the study and take responsibility for the integrity of the data and accuracy of the data analysis.

We are indebted to our medical and nursing colleagues and the infants and their parents who agreed to take part in this study. The following investigators, in addition to those listed as authors, participated in this study:
